We Helped The Tree Migrate To Office365

The Background

Relying heavily on technology, The Tree required for its fast growing team a range of productivity software, collaboration and cloud-based services, such as Office365 - a platform that is easy to use and is fully compatible with all the devices the company uses.

The Challenge

The Tree wanted an IT partner that would both sell licences, help with migration, installation and configuration, and also create internal knowledge base articles and provide a 30-days on site training to their employees.

THE TREE
BESPOKE CARPENTRY

- **Industry:** Furniture Manufacturing
- **Location:** Leigh, UK
- **Employees:** 2-10

About the Company

The Tree is a UK based carpentry manufacturing company offering beautiful pieces of functional art made with select raw-materials and a lot of passion.

The company combines classic craftsmanship, quality materials and meticulous attention to detail with technological advancements and contemporary design through an ethos of inspiration and innovation.

The Solution

Haar came with the solution to migrate their systems to Microsoft Office365 suite of products, and also helped implement and integrate these in their daily operations withing 5 business days.

Once the product has been operational, Haar migrated all their email services from a cPanel hosting to Office365, performed tests and made sure nothing has been lost.

By putting together a full set of help articles and an in-depth knowledge base, Haar managed to create the environment their employees needed to embrace the change and the new products.

Results & Improvements

With **Haar** full support, **The Tree** managed to perform a successful migration to Office 365, that brings together best-in-class productivity apps with powerful cloud services, device management, and advanced security.

Having all their files and emails stored in Microsoft Cloud meant that all employees could access them from any device and any location with an internet connection.

This was essential for **The Tree** – all their people needed to have access to the company's apps and data from anywhere in the world.
